

## OUR MISSION

### **People**

To retain well trained, well motivated, professional staff working and performing well as a team, in a safe and pleasant working environment, where respect and equal opportunities are promoted for all.

### **Product**

To develop and produce products of which we are really proud - about which everything says "Quality"- from product performance, presentation, delivery and customer service.

### **Profit**

To raise and maintain a satisfactory return so as to ensure the continued investment required for the long term success of the company.

### **Planet**

To manage our environmental responsibilities with a formal Environmental Management System, which includes the procurement of our raw materials, the efficient use of energy in the production and delivery of our finished products, minimising demands on non-renewable resources and reducing waste.

### **Productivity**

To improve our operational efficiency in all areas of production by increasing output and plant reliability using Lean Manufacturing techniques including improved maintenance regimes.
